**"Great surgeon and team"**

In the beginning of September I underwent septorhinoplasty. The surgery was without problems. Throughout the treatment period I was very, very satisfied. The reason why I decided to choose Prof. Gassner as surgeon is that he performs the surgeries in a gentle way and does not use nasal packings. At no time after the surgery did I feel any pain, I was able to breathe through my nose right away and I am completely satisfied with the result. Thank you Prof. Gassner for this great job. Also, a great thanks to his very friendly team. Everybody who is thinking about a surgery like mine – do not hesitate! With Prof. Gassner you will be in the best of hands!

I can only recommend him 100% - Top choice!

---

**"Competent and likeable surgeon + great team!"**

I found Prof. Gassner and his team on the internet. The atmosphere during the first contact with the team as well as during the first consultation was very pleasant and trustworthy, so I felt in best hands from the very beginning. On the day of my surgery (face lift) I was very well looked after, I really have to point out how great Dr. Gassners' team is. 3 months after the surgery I am completely satisfied with the result. Therefore, I can absolutely recommend this practice!

---

**Three years ago I had my pronounced “turkey neck” corrected by Dr. Gassner. My expectations were fully met. Already after few days I could tell that I had made a good decision. During the preoperative consultation, Dr. Gassner reassured me with his pleasant and competent demeanor. I felt all my concerns were addressed and I was well taken care of. I am overjoyed with the result and would make the same decision again.**

Ich habe durch Akten in Internet Dr. Gassner als einen der wenigen erfahrenen Spaltknasen Operateure gefunden. Vier sehr intensive Wochen von Anfang an und habe mich gleich sicher gefühlt. Das Ergebnis ist beeindruckend und das bei einer sehr komplizierten OP bei ausgeprägter Lippen-Kiefer-Gaumen-Palate.

Besonders positiv war die offensichtlich sehr kompetente Durchführung der OP das Ergebnis einer konsistenten, deutlichen Verbesserung bei unendlich vielen, die sehr komplexe Nachsorge in der Praxis (wie erfahrungsgemäß auch im ambulanten Bereich) sowie die Freundlichkeit von Arzt und gesamtem Praxisservice. Besonders war erfreulich, dass die Maßnahmen für die Patienten gut verständlich erläutert wurden und der Helfer der Chirurgen sehr gesehen wurden.

Einen herzlichen Dank an Herrn Prof. Dr. Gassner und das gesamte Team. Mir wurde jegliche Angst vor der OP genommen und das gesamte Team (vor allem auch die liebe Anästhesistin) körnerte sich bedacht, der Arzt ist durch wahrhaft und freundliche Art absolut vertrauenswürdig. Er notiert sich auch viel Zeit, um jede meiner Fragen zu beantworten. Ich kann die Praxis unbedingt empfehlen.

---

**Very competent and experienced surgeon in cleft nose rhinoplasty**

I found Prof. Gassner as one of only a few experienced surgeons for cleft noses. Form the very beginning, I was happy and felt in good hands with him. The result is excellent, even though the surgery was a very complex rhinoplasty for complete cleft of nose, lip and palate.

**Extensive (ambulatory) surgery of the nose (to improve breathing)**

There are some things that were especially positive: the obviously very competent performance of the rhinoplasty surgery, the clear improvement of breathing, the very caring follow-up care in the practice (if needed also on Sundays or holidays), as well as the kindness of the surgeon and his team.

Also, it was very positive that the whole procedure was explained very clearly and that the healing process was displayed on the monitor.

**Technically and socially at top level**

A very kind and accommodating surgeon who tells you everything about risks and chances. I’m totally happy with the result!

**Great surgeon and great team!**

A big thanks goes to Prof. Dr. Gassner and the whole team. They took away all of my anxiety about the rhinoplasty surgery and the whole team took lovingly care of me (especially the lovely anesthesiologist). The surgeon is absolutely trustworthy because of his calm and friendly ways. He took a lot of time to answer all of my questions. I can absolutely recommend this practice.
I have never felt to be in such good hands like I did in this practice

Professor Gassner is a very competent and likeable surgeon who takes a lot of time for his patients. In addition to the very modern practice, his team is very friendly and very approachable so they took away a lot of my concerns. The surgery of my nose (for breathing and for cosmetic reasons) was performed ambulatory in the practice and went very well. I am more than happy with the result. Due to the soft and modern surgical technique used by Professor Gassner there was nearly no pain after the surgery. I can only recommend Professor Gassner and his team.

Competent surgeon, great team!

After a long time of research as well as a recommendation of a good friend of mine I finally had surgery of the nose in January 2018. Already in the counseling interview, I was completely satisfied with Professor Gassner. He patiently answered all of my many questions and took away my fear of the anesthesia. From the very beginning I felt to be in good hands. With the results of my new nose I am overjoyed.

Great team and great surgical management!

THANK YOU!

Very kind and competent surgeon

A really likeable and competent surgeon. I felt comfortable from the very beginning. Prof. Dr. Gassner explained everything about my nose surgery in detailed and comprehensible fashion. I am more than happy with the result and I had really no pain during the whole procedure. The team is so friendly and courteous. I can only recommend this practice and especially Professor Gassner.
**Sehr kompetenter und lieber Arzt mit totem Praxisteam!**

**A very competent and trustworthy surgeon with a great team!**

My nasal septum was quite crooked and the shape of my nose was not pretty. During the consultation Professor Gassner explained his new, special surgical techniques for the nose in a very detailed way and took away my concerns with his calm and positive demeanor. I gained confidence and felt to be in good hands. The team is extremely friendly and takes good care, too. The surgery itself was successful and I hardly felt any pain. The result of my "new" nose makes me more than happy. Prof. Dr. Gassner spends a lot of time with his patients in several consultations after the surgery and accompanies them for the first weeks after the intervention. It was the best decision – highly recommended!

**Excellent surgeon, great team!**

Due to a serious previous illness, a complete reconstruction of my nose was necessary. On the recommendation of the University Clinic of Regensburg I presented to Prof. Dr. Gassner. Because of the urgency I got an appointment very quickly. The Professor spent a lot of time to explain all the four needed steps of the reconstructive-procedure to me in a very detailed way. Afterwards I was completely convinced to be in the best hands. Everything was great from the very beginning; very likeable and competent team as well as the excellent management of the practice and the surgery itself. Absolut recommendation!!!!
Expertise that is lived

After an unsuccessful surgery of the nose (elsewhere), Professor Gassner performed the correction of my nose and did very well to rebuild the deformed state of the nose. The breathing function was improved and this led to a profound improvement of my quality of life.

Professor Gassner's philosophy is implemented by his team as you can feel the expertise, empathy and the superior engagement in all of them.

Specialist with dream-team

Six days ago, I had a surgery of the nose. The external shape as well as the breathing function were corrected. I have planned and thoroughly considered my nasal surgery for a very long time. We read up on it a lot (my houseband is also a surgeon and the expectation was quite high).

We came to Professor Gassner on recommendation and we are very thankful for that, because it couldn’t be any better. Professor Gassner was very pleasant, spent a lot of time for all my questions during the consultation and explained the treatment in every detail.

Right after the surgery – six days ago now – I was able to walk to my hotel without any pain. Professor Gassner didn’t use tamponades and his surgical techniques are especially soft.

The following days I felt very good. Today, the 7th day after the surgery, the cast was removed and I am stunned by the result!

The very likeable team is great: friendly, competent – simply incredible!

I can only highly recommend Professor Gassner and his team for 100%. If there will be any other concern in the future, I am sure to visit Professor Gassner again.

Thank you very much!

Living a more self-confident life after correction of cleft nose

Dr. Gassner performed a correction of my cleft nose by septrhinoplasty. The surgery was quite extensive as he took cartilage of my ear and rib for the rebuilding of the nose. It enabled me to breathe through both sides of the nose. The result is an absolute success – medically as well as aesthetically. During the preoperative and follow-up care I received good advice and care. All of my questions and wishes were met. Technically and socially Dr. Gassner is a very good and competent surgeon.

I would trust him again for surgery anytime!
“Technically and socially a great surgeon” +

Professor Gassner performed a correction of my nose. I was quite skeptical, because I already had nasal surgery in the past (other surgeon) which didn’t meet my expectations. After my surgery, I can only recommend him 100%. With the simulation on the computer he doesn’t promise anything he cannot implement. It is obvious that financial profit is not his primary objective. Although I had a very complex history there were no complications during the surgery and the result is excellent!

“Very trustworthy and competent”

From the very beginning to the end I was satisfied with the practice, the surgeon and the result. The result is as simulated and great! I had no pain, felt completely cared for and all of my questions were answered in every detail so all of my concerns disappeared. Everything was great. Thank you very much.

“100% recommended!”

Professor Dr. Gassner performed a Rhinoplasty (removal of the hump). I was a little panicked, because I’ve already had a surgery of my nose for medical reasons by another surgeon. Professor Gassner is an excellent surgeon from a technically as well as social point of view. I am completely satisfied and stunned by the result. Moreover, I want to praise the nice ladies at the reception: you feel you are in the best of hands here.
An absolutely professional, competent and very pleasant surgeon

Mr. Gassner did a surgery of my face by suturing my facial nerve! He is always well informed about the latest methods of treatment and spends a lot of time for his patients’ counseling. I would recommend this surgeon to everyone! Thank you very much for the great treatment!

Receding chin treated without jaw surgery

Professor Gassner gave my face a new shape by performing a silicone pad implantation under the chin – nearly invisible from outside. It was a minimally invasive intervention with a great optical effect. Only the following 3 days after surgery I had mild limitation with speaking and the intake of hard food with only slight pain. I was able to walk on my own without appreciable limitations 2 hours after this feel-good-surgery.

He has restored what another surgeon could not

After the removal of a major basal cell carcinoma (basalioma) located to the left ala of the nose the wound was closed by another surgeon using skin transplants taken from the hip. The result was a complicated wound healing process, a crooked nose and breathing limitations. I came to Professor Gassner on recommendation. During the first consultation I already had the feeling to meet a very competent surgeon responding to patient’s concerns. The reconstructive procedures took 3 months and 4 surgical procedures and included the movement or turn-over of flap of skin from the forehead on top of the nose. The result can really be put on display! The function of the nose is also completely restored. I can only highly recommend Prof. Gassner for these kinds of facial surgeries. Besides his obvious skills and innovative ideas in this field, he is a surgeon who is able to build a bond of trust to his patients very fast by his competent and friendly demeanour.
Palsy of the facial nerve (Bell’s palsy)

Professor Gassner uses nearly invisible sutures to avoid eye-catching scars and to achieve a beautiful and natural result.
In the last 3 years I had three surgeries: The first one was the transplantation of a nerve from the lower leg to the face. The second one was a transplantation of a femoral muscle into the right part of the face and the last surgery dealt with the definition of this muscle as well as forming a fold on the side of the nose. All in all I have got 3 scars in and around my face ranging an area of 6-8 cm each. Muscle and nerve are both active, which means I am able to control the corner of the mouth.

Professor Gassner is a friendly and courteous, professional and dedicated surgeon throughout the treatment - from the very first consultation through to the follow-up care. His team is very nice and they are located in a very modern-equipped practice.

Exceedingly competent and sympathetic – best choice!

After an accident, Professor Gassner performed a surgery of my nose. The result of this aesthetic restoration satisfies me 100% and I feel very well taken care of.
He was very caring during the follow-up appointments. I can absolutely recommend him. Great practice!

Like a swiss clockwork

I had already been operated twice on the nose, but the problems with breathing persisted. Furthermore, the back of my nose was uneven. Because I am living in another country, I contacted Professor Gassner by phone at first. The organization of everything following was excellent: consultation on Monday, surgery on Tuesday, sleepover in a hotel, follow-up care until Friday. On Saturday I took the flight back home. The nose was hardly swollen anymore. Most notably, I am able to breathe again through the nose. Already when I woke up from anesthesia, my breathing was better than ever before. Now, the surgery is only 4 weeks ago and the swellings have completely regressed. I had not thought this was possible anymore and I’m very, very happy now. My sleep has improved and my wife says that snoring reduced a lot. I can really recommend Professor Gassner.
Absolut zufrieden. Top Ergebnis, uneingeschränkt empfehlenswert

Höchste Kompetenz und Erfahrung, meine uneingeschränkt empfohlene Erfahrung!

Bevor ich Anfang 2017 zu Prof. Gassner kam, hatte ich bereits eine unglaubliche Vorreise mit meiner Nase (Tumor) zu verzeichnen und dachte eigentlich an eine Rekonstruktivtherapie (Mehrere OPs und Strahlentherapie). Dann sah ich Herrn Prof. Gassner und es war sofort klar für mich: hier ist er richtig!

“Absolutely satisfied. Great result, absolutely recommendable”

Professor Gassner performed a septorhinoplasty due to an extremely crooked nose as well as a septal deviation (more to improve the breathing function, partly also for aesthetic reasons). The surgery dates back only 3 weeks and in my eyes the result is absolutely perfect. Breathing through the nose improved a lot and Professor Gassner gave my nose a very nice shape, yet hardly noticeable change. The relation with the surgeon was outstanding: the treatment has been explained to me in every detail and my questions were addressed in the best possible way, the team made every effort to address and ameliorate my nervousness and concerns.

With Professor Gassners’ endonasal surgical technique it was possible to perform this as an ambulatory procedure and it was absolutely no problem to be back home 1 hour after waking up from the anesthesia. I hardly needed any pain relievers and tamponades were not used (it is often argued that removal of them is the worst part of a nose surgery). Right after a few days the cast could be removed and after one week my surgery was hardly visible for other people any more. Meanwhile (3 weeks after the surgery) I can hardly see any swelling by myself, and I am so happy about my new nose every time I take a look in the mirror.

The follow-up care was also done quite thoroughly and everything was explained in best possible detailed way.

All in all, I am 100% satisfied and I would do it again here anytime. I would recommend this surgeon to all of my family and friends.

“Highest expertise and experience, my absolute recommendation”

When I came to Professor Gassner in the beginning of 2017, I have already been through an extensive history about my nose (tumor). That’s why I was a high risk case (some prior surgeries and radiotherapy). From the first meeting with Professor Gassner it has been quite clear for me that I am in the right place!

Professor Gassner demonstrated his plans for the reconstruction of my nose in a very detailed way (it would be too much to explain every detail of all the steps...). Additionally, Professor Gassner spent a lot of time to answer all of my questions before and after the surgery. His marked expertise and his positive charisma put my mind at ease.

There is a calm and pleasant atmosphere in the practice. The colleagues and assistants are very courteous and friendly. The positive outcome could never have been taken for granted. Dr. Gassner’s performance can only be graded with the best available evaluations.
“Treatment of our 5-year-old daughter’s facial nerve palsy”

Our daughter was born with a congenital facial palsy of the right part of her face due to Moebius-syndrome. Very early we heard about the possibility to treat this facial palsy by surgery. As soon as we’ve heard about Professor Gassner being able to perform such surgeries we got in contact with him and after the preliminary talk we decided to give it a chance when our daughter reaches a suitable age. Finally, when she was 5 years old, the transfer of Musculus Gracilis was performed. The Gracilis-Muscle was taken out of the thigh, transplanted to her face and connected with the nerves to reconstruct the facial nerve. 10 weeks later, she could already move this muscle actively. We are overwhelmed by this result and we can only highly recommend Professor Gassner and his team! Thank you so much to Professor Gassner and Professor Boahene who made this possible!
